

The human-climate-wildlife nexus

Author(s): Chavarria G, Knowlton K, Atchley D
Year: 2010
Journal: The Bulletin of The Atomic Scientists. 66 (1): 48-56

Abstract:

As more and more diseases are discovered to be of animal origin and the effects of climate change on disease become clearer, now is the time to examine how best to mobilize health professionals, policy makers, and security experts around these connections.

Resource Description

Exposure :

weather or climate related pathway by which climate change affects health

Ecosystem Changes, Extreme Weather Event, Human Conflict/Displacement, Precipitation, Sea Level Rise, Temperature

Extreme Weather Event: Drought, Flooding, Hurricanes/Cyclones

Temperature: Fluctuations

Geographic Feature:

resource focuses on specific type of geography

None or Unspecified

Geographic Location:

resource focuses on specific location

Global or Unspecified

Health Impact:

specification of health effect or disease related to climate change exposure

Infectious Disease

Infectious Disease: Foodborne/Waterborne Disease, Vectorborne Disease, Zoonotic Disease

Foodborne/Waterborne Disease: General Foodborne/Waterborne Disease

Vectorborne Disease: General Vectorborne, Mosquito-borne Disease, Tick-borne Disease

Climate Change and Human Health Literature Portal

Mosquito-borne Disease: Dengue, West Nile Virus

Tick-borne Disease: Crimean-Congo Haemorrhagic Fever

Zoonotic Disease: Anthrax, General Zoonotic Disease, Nipah Virus, Other Zoonotic Disease

Zoonotic Disease (other): Monkeypox; Bovine spongiform encephalopathy

Medical Community Engagement: 

resource focus on how the medical community discusses or acts to address health impacts of climate change

A focus of content

Mitigation/Adaptation: 

mitigation or adaptation strategy is a focus of resource

Adaptation

Resource Type: 

format or standard characteristic of resource

Research Article

Timescale: 

time period studied

Time Scale Unspecified
